

GLENDIVE MEDICAL CENTER

Glendive, Montana

STEINER THUESEN PLLC provided design development and construction drawings for a new courtyard and parking area that was part of the medical center expansion. The design included colored concrete, a naturalistic stream, site furnishings, landscape lighting, perennials and ornamental plantings and automated irrigation.

Several different informal outdoor rooms were created throughout the courtyard to provide both public as well as private spaces. The courtyard provides a comfortable space for patients and their loved ones while visiting the medical center. Ornamental planting, lighting, and irrigation were also provided at the new patient drop-off and parking area enhancing the patient experience.
