

RIVERSIDE CEMETERY - GRAHAM EXPANSION

Cody, Wyoming

Steiner Thuesen PLLC has had an ongoing relationship with the Riverside Cemetery District since 1991. The firm was recently commissioned to develop a Master Plan for the expansion of the Riverside Cemetery on a 30-acre parcel located on the northeast edge of Cody. The master plan includes plots for approximately 9,325 graves. Paved streets will provide access throughout the cemetery. Treated effluent from the city sewage lagoons will be pumped to a reservoir located on the property and will be used for irrigating the cemetery.

The initial phases of the planned development included construction of E Avenue, concrete lining of the canal that crosses the site, installation of the reservoir and pump house, installation of the effluent supply line, rough grading of the entire site, and perimeter fencing.

Nine acres of the cemetery are fully developed and ready for use. Completed improvements include entry signage, paving of roads, landscaping and irrigation, installation of effluent pump and ultraviolet treatment equipment, and the irrigation pump station.

A memorial area has been developed providing a space where an individual or group of people can come and relax in a comfortable setting while they reflect on a loved one. The memorial circle includes the following design elements:

- Decorative hardscape
- Overhead shade structure
- Masonry seatwalls
- Site furnishings
- Flagpoles
- Lighting
- Landscaping
- Water feature
- Directory
