

GOLF COURSE ARCHITECTURE

BILL ROBERTS GOLF COURSE

Helena, Montana

A complete remodel of the front nine, including new greens, tees, bunkers, water features, tree planting and irrigation systems was performed for this municipal golf course. A multi-phased approach was used during construction, permitting the project to be funded with profits generated by operation of the golf course.

"The design and construction planning has allowed us to maintain reasonable play conditions on Bill Roberts Golf Course at all times during remodeling. You could always get in an 18 hole round."

Randy Lilje
Community Services Director
